TechTalk: Are you ready to ride the next IT wave?

Everyone's tweeting about Google Wave – is the tide ready to turn and what will this mean for your organisation? Attend TechTalk 2009 and hear from some of the country's top leading IT professionals speaking on a single platform in a format designed to enable you to debate the issues that are important to YOU.

- **How can you leverage new emerging technologies such as social computing platforms, Microblogging and Google Wave?**
- **Discover how your organisation can be more successful through accessing Application Programming Interface (APIs) Mash ups and reusable components.**
- **What is new in open source and what does this mean for you?**
- **Meet partners who can help and inspire you to get your next generation strategy off the ground.**

Keynote Speaker Mark Rock - CEO & Founder of Audioboo and Best Before

The Panel

Andrew Bettany of University of York and recent speaker at the **TechEd Europe** event.
Colin Beveridge; Author of **Aligning IT with Business Strategy** and Columnist: **Computer Weekly**.

The Moderator

Jim Pendrill - Editor of Insider

YOU, the panel and Mark can debate and decide the future.

To hear the 'what's' and 'how's' explained from successful businesses at TechTalk
